- (1) Make sure the SIM card network is GSM ONLY;
- (2) Ensure that the SIM card comes with data function and caller ID display function;
- (3) Make sure that there is sufficient credit for the SIM card;
- (4) Make sure that the SIM card does not have a password (PIN1, etc.);
- (5) The SIM card must be inserted when the watch is off;

(6) Please set the family member numbers in the mobile app before using the SOS button;

(7) Positioning functions does not work when the watch is power off, has no SIM card credit, or GSM network is out of service area.

9. FAQ

Q: How to switch on/off the watch?

A: (1) Press and hold the "Power" button for around 3 seconds. If the watch cannot boot, it may be caused by long-distance transport and watch runs out of power. Please recharge the watch and reboot.

(2) Remote switch off the watch via mobile app.

Q: Failed to scan QR code?

A: If failed to scan QR code, please move to a brighter place and retry, or adjust the distance between mobile lens and QR code.

Q: What O.S. does the watch support?

A: The watch supports iOS (V7.0 and above) and Android (V4.0 and above).

Q: When some phone numbers call the watch number, why cannot get it through?

A: In order to protect the privacy of the watch user, only numbers in "Family & Friends" can call the watch number.

Q: How to delete members?

A: Use administrator account to login the app, enter "Family & Friends", press and hold on the number to be deleted, on the pop-up menu select "delete".

Q: It's slow to receive voice messages sometimes.

A: Because the longer time the voice is being recorded, the longer download time it needs.

Q: How to repeat listening voice message?

A: The watch doesn't support repeat listening because of limited memory. The voice messages will be deleted automatically after being played.

Q: How to delete friends?

A: Use administrator account to login the app, enter the "Family & Friends", press and hold on the friend's number to be deleted, on the pop-up menu select "delete".

Q: Watch feels the heat.

A: It is normal for slight heat when the watch is being charged.
